GEMSTONE REPORT
EDELSTEINBERICHT
RAPPORT DE PIERRE PRÉCIEUSE

Appendix to Report-Nr. GRL9709100

Date 18. Sep 97

Quality and Rarity Report

This is to attest that the undersigned were privileged to carefully and thoroughly examine a faceted blue sapphire of 100.15 cts

Colour Very fine intense royal blue hue, characteristic of the rarest sapphires from Myanmar (Burma).

Transparency The high transparency of this fine jewel, regarding its extraordinary size, may be characterized as unique.

Microscopic examination An extremely delicate silk and film-like fluid feather, not visible to the naked eye, corroborate the origin to be Myanmar (Burma) and that this precious gemstone was in no way treated.

Rarity

Faceted Burmese sapphires of this quality and size are sumptuous rarities worthy the finest royal collector. According to our classification this magnificent sapphire can be assigned to the category of WORLD RECORD gemstones.
